Lifecycle Management

TECHPRO EDUCATION

Lifecycle Management

What is Lifecycle Management?

- Lifecycle management is to determine how an object will be subject to a storage policy during the time it is stored in S3.
- So, it is used to ;

Transition objects to another storage class,

Archive objects,

Delete objects after a specified period of time.

Lifecycle Management

Lifecycle Management

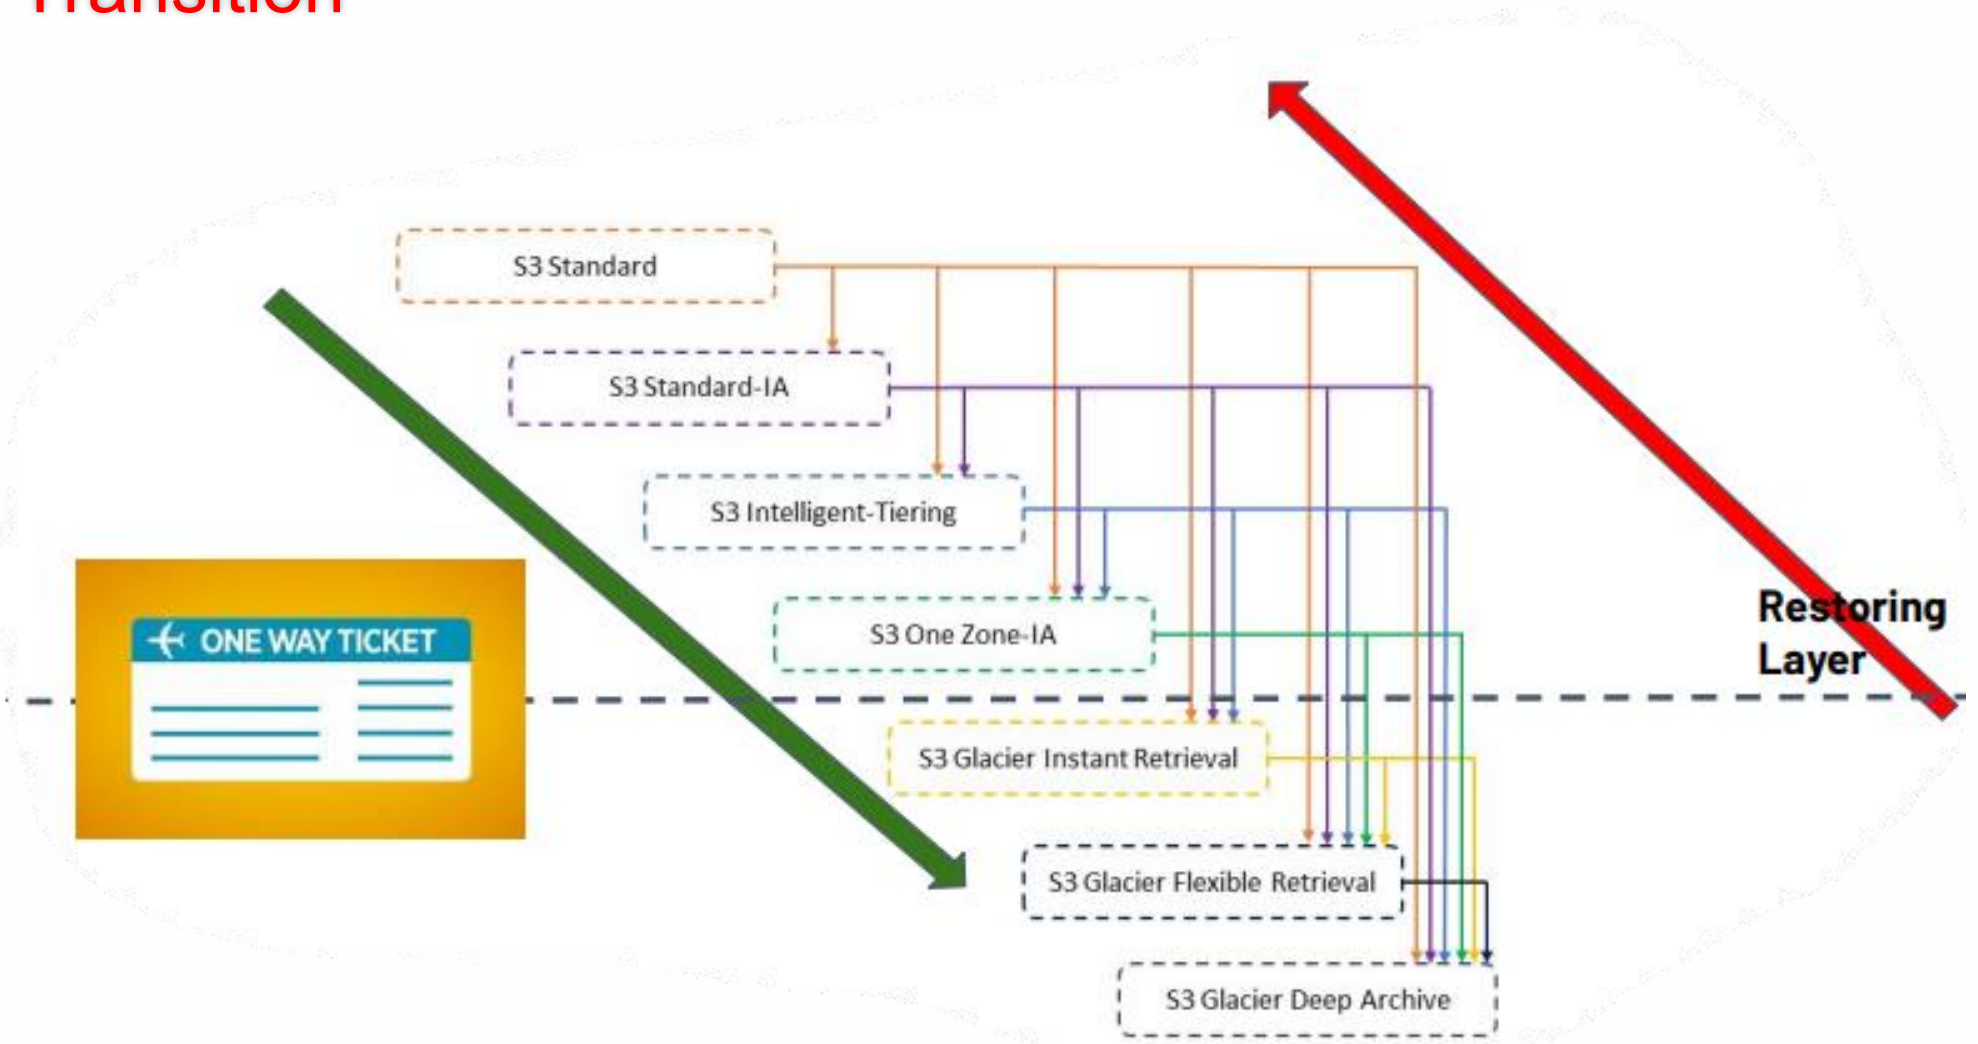

- A lifecycle policy is bucket-base component.
- You can narrow Lifecycle Management by using a prefix or tag
- Available for both current and previous
- Minimum days for transition

TECHPRO EDUCATION

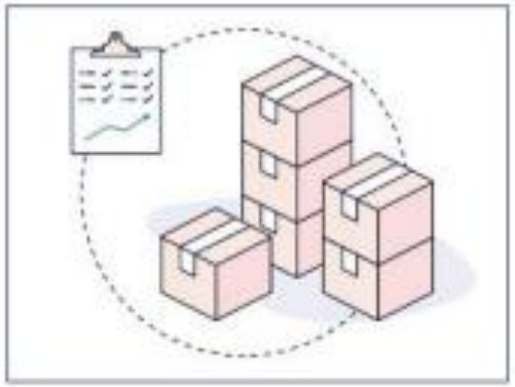

Lifecycle Management

Transition

Lifecycle Management

Advantage of Lifecycle Management

- It provides you to arrange your S3 inventory,
- You can save money by transition the objects to the cost-effective storage class,
- You can get rid of redundant objects,

Bucket Replication

TECHPRO EDUCATION

Bucket Replication

What is Bucket Replication?

Bucket Replication

What is Bucket Replication?

- Replication is to copy the objects in the buckets to another bucket in different region or in the same region.
- There are 2 types of replication in S3:

- Cross-Region Replication (CRR) is used to copy objects in different AWS Regions

- Same-Region Replication (SRR) is used to copy objects in the same AWS Region

TECHPRO EDUCATION

Bucket Replication

Replication Features

- Keep the object's metadata while replicating
- Replicating in Different storage class
- Option of changing ownership of the replicated object
- Synchronizing within 15 minutes.
- Narrowing replication based on prefix or tag

TECHPRO EDUCATION

Bucket Replication

Why Replication?

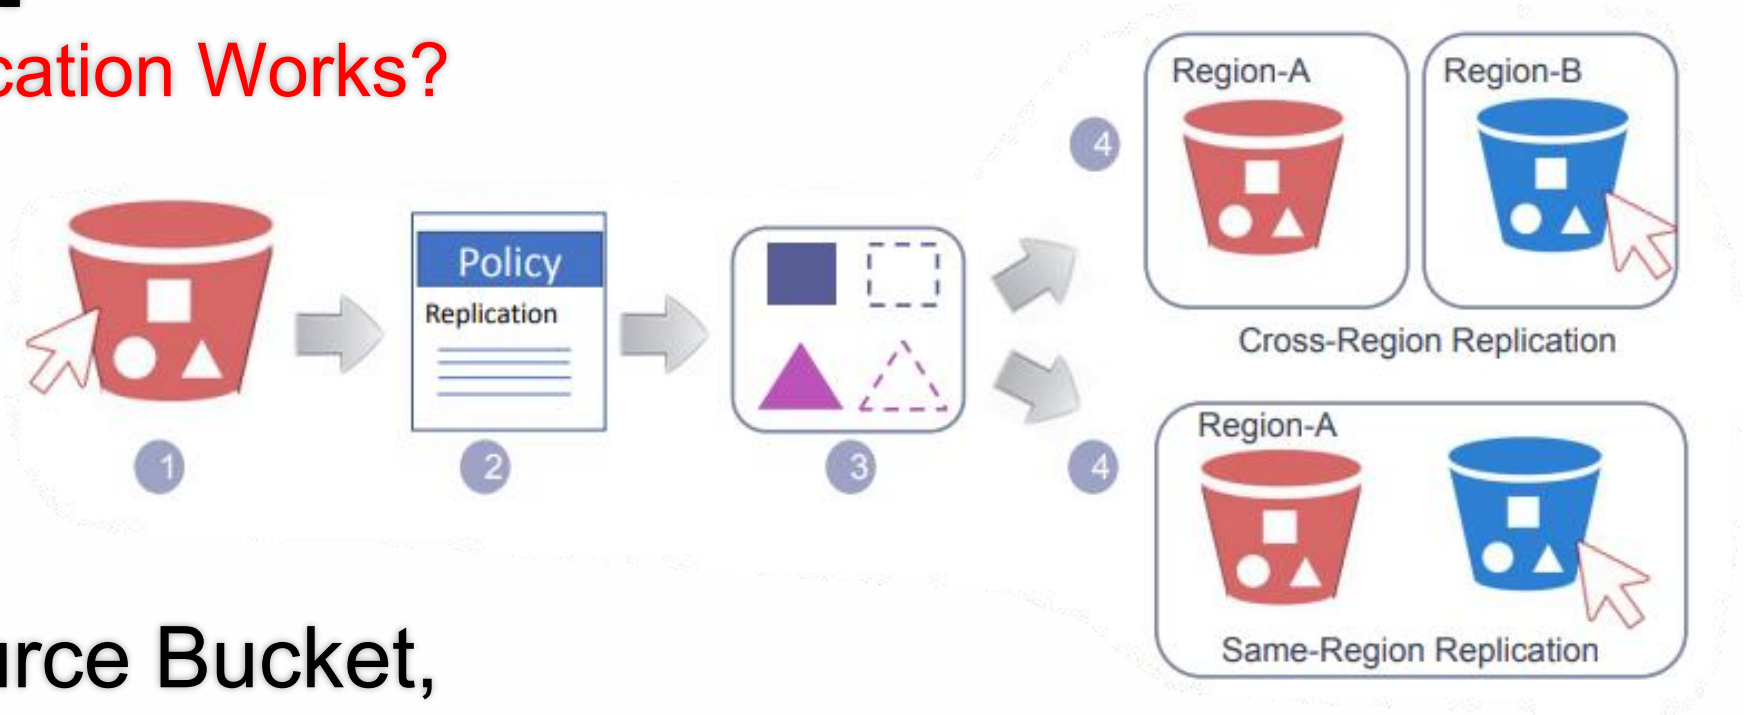

- Compliance requirements
- Backup
- Minimize latency
- Aggregating related data into a single bucket.

TECHPRO EDUCATION

Bucket Replication

How S3 Replication Works?

1- Select the Source Bucket,

2- Determine your replication policy,

3- Select your data set by object tag, prefix or entire bucket,

4- Select the Destination Bucket in the same region or in different region.

TECHPRO EDUCATION

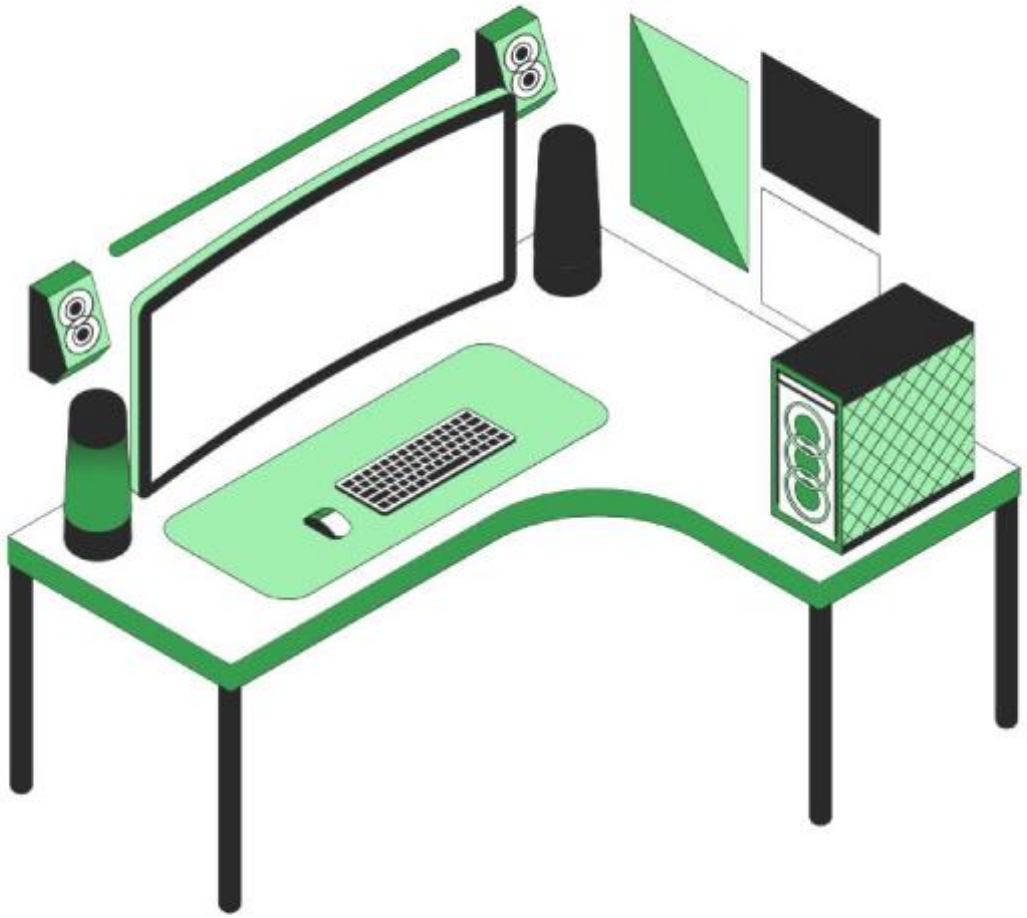

Bucket Replication

Creating Bucket Replication

Bucket Replication Path

S3>Bucket> Management > Bucket Replication >Create Replication Rule
